**Subject:** What will be in Posters 4 & 5?

Dear Kellie,

Thank you for organizing us. Attached is a version with additions of EPA participants (some unconfirmed) and contact info. We will need to check closer to the meeting date about the EPA's availability to the press at that time. Rusty is our Superfund communications liaison, so if it makes sense for him to attend, he would be our press contact person. If so, then he may be more appropriate than David to sit with Bill Franklin at the check in table. But we'll know more later. I have left messages with Jackie and David about their poster assignments, but I haven't heard back.

Can you send Posters 4 & 5 to me and Nina? I'm not sure what they contain. Nina and I heard about these on an earlier call today with Dr. Covello, and we'd like to review them. As I said on today's conference call, it is not the role of the Navy or regulatory agencies to determine future land uses. We should therefore be neutral about land use selection in any public communication. Our role is to ensure that the cleanup is appropriate for whatever land use is decided by other entities.

Thanks!

Lily
